

## ► leadpipes

Our instruments are all appointed with ML (medium large) leadpipes - parabolic/conical shaping (appropriate for all standard mouthpieces).

We can also build, upon request, in small, medium and large sizes, as well as customized leadpipes for US mouthpieces (only with interchangeable leadpipes).

Our Piccolo trumpets can also be built with a leadpipe for cornet shaft mouthpieces and heavy leadpipes for US mouthpieces.

Upon request, we can also fashion a customized leadpipe for you, according to the size of your mouthpiece.
